PROFILE

Computer Science Undergraduate with strong foundation in Data Structures & Algorithms, Full-Stack Web Development, Database, and Applied AI/ML, with a focus on Natural Language Processing (NLP) and Gen AI.

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs
- **Framework / Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- **Databases**: MongoDB, Oracle (SQL)
- **AI / ML & NLP**: scikit-learn, Pandas, NumPy, Matplotlib, NLTK, HuggingFace Transformers, BERT, Sentence-BERT
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Linux (Ubuntu)

EDUCATION

- BTech|Computer Science & Engineering|KIIT UNIVERSITY, BHUBANESWAR|2023-27 *CGPA: 9.41*
- XII|CBSE|SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI|2022 *PERCENTAGE: 89.8%*
- X|CBSE|SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI|2020 *PERCENTAGE: 95.4%*

PROJECTS

Career Intelligence Platform | AI/NLP-Based System *Github*

Tech: Python, BERT, Sentence-BERT, Pandas, scikit-learn, HuggingFace Transformers

- Integrated 11 LinkedIn datasets to build a unified data pipeline and advanced analytics (skill graph, career transition scoring, role volatility).
- Standardized job titles using BERT-based models with structured taxonomy and classification.
- Developed a semantic job recommendation engine using Sentence-BERT with multi-factor scoring (location, salary, experience).
- Built a skill gap analysis system with personalized learning pathways and designed evaluation methods for validation.
- Implemented job summarization and market analytics for improved job insights and comparison.

Demo: https://skillforge-career-intelligence-plat.vercel.app/

Blog Web-Application | Full-Stack Web Development *Github*

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs

- *Built a full-stack blogging platform using the MERN Stack with responsive UI and RESTful APIs.*
- *Implemented JWT authentication, Google OAuth, email verification, and role-based access control.*
- *Developed blog creation, editing, categorization, search, and image upload functionalities.*
- *Added social features (follow/unfollow) and admin tools for user, category, and content management.*

Demo: https://blog-sphere-website.vercel.app/

Diabetes Prediction|Machine Learning Github

Tech: Python, NumPy, Pandas, Matplotlib, scikit-learn

- Built and evaluated multiple ML models including Logistic Regression, SVM, KNN, Random Forest, Naive Bayes, and Gradient Boosting for diabetes prediction.
- Performed data preprocessing, visualization, and feature analysis to improve model performance.
- Evaluated models using Accuracy, ROC-AUC, Cross-Validation, and Confusion Matrix to ensure reliability.

ACHIEVEMENTS

- CGPA 9.41/10.0 - consistently in top 5% of cohort at KIIT University (2023–present)
