 [/Aman-Pandey](#)

PROFILE

Computer Science Undergraduate with strong foundations in Data Structures & Algorithms, Full-Stack Web Development, Databases, and Applied AI/ML, with a focus on Natural Language Processing (NLP). Passionate about building scalable, data-driven applications to solve real-world problems.

TECHNICAL SKILLS

- ✧ **Programming Languages:** C, C++, Java, Python
- ✧ **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Express.js
- ✧ **Framework / Stack:** MERN Stack
- ✧ **Databases:** MongoDB, Oracle (SQL)
- ✧ **Applied Artificial Intelligence & Machine Learning:** Natural Language Processing (NLP)

EDUCATION

- ✧ BTech | Computer Science & Engineering | KIIT UNIVERSITY, BHUBANESWAR | 2023-27 CGPA: 9.38
- ✧ XII | CBSE | SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI | 2022 PERCENTAGE: 89.8%
- ✧ X | CBSE | SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI | 2020 PERCENTAGE: 95.4%

PROJECTS

- ✧ **Career Intelligence Platform | AI/NLP-Based System** [\[GitHub Repo\]](#)
 - Integrated 11 LinkedIn datasets to build a unified data pipeline and advanced analytics (skill graph, career transition scoring, role volatility).
 - Standardized job titles using BERT-based models with structured taxonomy and classification.
 - Developed a semantic job recommendation engine using Sentence-BERT with multi-factor scoring (location, salary, experience).
 - Built a skill gap analysis system with personalized learning pathways and designed evaluation methods for validation.
 - Implemented job summarization and market analytics for improved job insights and comparison.
- ✧ **To-Do Web-Application | Web Development (Node.js, Express, JavaScript, HTML, CSS)** [\[GitHub Repo\]](#)
 - Built a full-stack task management app with user authentication and session tracking.
 - Implemented RESTful APIs and CRUD operations for personal todo lists.
 - Designed responsive UI with glassmorphism and implemented search/filter features.
 - Implemented JSON-based data storage instead of a database.
- ✧ **Diabetes Prediction | Machine Learning** [\[GitHub Repo\]](#)
 - Built and evaluated multiple ML models including Logistic Regression, SVM, KNN, Random Forest, Naive Bayes, and Gradient Boosting for diabetes prediction.
 - Performed data preprocessing, visualization, and feature analysis to improve model performance.
 - Evaluated models using Accuracy, ROC-AUC, Cross-Validation, and Confusion Matrix to ensure reliability.
