PROFILE

Computer Science Undergraduate with strong foundation in Data Structures & Algorithms, Full-Stack Web Development, Database, and AI/ML, with a focus on Natural Language Processing (NLP) and Generative AI.

TECHNICAL SKILLS

- **Programming Languages:** C/C++, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST APIs
- **Framework / Stack:** MERN (MongoDB, Express.js, React.js, Node.js)
- **Databases:** MongoDB, Oracle (PL/SQL)
- **AI / ML & NLP:** scikit-learn, NumPy, Pandas, Matplotlib, NLTK, HuggingFace Transformers, LangChain, RAG, Vector Databases (ChromaDB)
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Render, Streamlit, Linux (Ubuntu)

EDUCATION

- BTech | Computer Science & Engineering | KIIT UNIVERSITY, BHUBANESWAR | 2023-27 CGPA: 9.41
- XII | CBSE | SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI | 2022 PERCENTAGE: 89.8%
- X | CBSE | SUNBEAM ENGLISH SCHOOL BHAGWANPUR, VARANASI | 2020 PERCENTAGE: 95.83%

PROJECTS

WisdomAI: A Wikipedia Companion Chatbot | AI/NLP-Based System — RAG Chatbot

[Github](#)

Tech: Python, LangChain, HuggingFace Transformers, ChromaDB, Sentence-Transformers, Streamlit

- Built a Retrieval-Augmented Generation (RAG) chatbot answering queries using real-time scraped Wikipedia content via LangChain, ChromaDB, and Sentence-Transformers embeddings.
- Implemented a scraping and chunking pipeline (BeautifulSoup + RecursiveTextSplitter) to convert live Wikipedia articles into a searchable vector store.
- Integrated Qwen2.5-7B-Instruct via HuggingFace Inference API for context-grounded response generation.
- Designed an interactive Streamlit UI for real-time conversational querying, deployed on Streamlit Community Cloud.

Demo: <https://wisdomaia-wikipedia-companion-chatbot.streamlit.app/>

TELL: Blog Web-Application | Full-Stack Web Development

[Github](#)

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs

- Built a full-stack blogging platform using the MERN Stack with responsive UI and RESTful APIs.
- Implemented JWT authentication, Google OAuth, email verification, and role-based access control.
- Developed blog creation, editing, categorization, search, and image upload functionalities.
- Added social features (follow/unfollow) and admin tools for user, category, and content management.

Demo: <https://tell-blog-website.vercel.app/>

Diabetes Prediction Model | Machine Learning

[Github](#)

Tech: Python, NumPy, Pandas, Matplotlib, scikit-learn

- Built and evaluated multiple ML models including Logistic Regression, SVM, KNN, Random Forest, Naive Bayes, and Gradient Boosting for diabetes prediction.
- Performed data preprocessing, visualization, and feature analysis to improve model performance.
- Evaluated models using Accuracy, ROC-AUC, Cross-Validation, and Confusion Matrix to ensure reliability.

ACHIEVEMENTS

- CGPA 9.41/10.0 - consistently in top 5% of cohort at KIIT University (2023–present)
